OUTCOME IDN_D_2.1 [XM-DAC-41146-IDN_D_2.1](#)

Institutions and people contribute more effectively to advance a higher value-added and inclusive economic transformation

OUTCOME DETAILS

SDG alignment

Impact areas

Women's economic empowerment

Organizational outputs

Financing for gender equality

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Advocacy, communications and social mobilization

Capacity development and technical assistance

Integrated policy advice and thought leadership

Outcome Description

UNSDCF Outcome 2: Institutions and people contribute more effectively to advance a higher value-added and inclusive economic transformation

	2021 (Milestone)	No	FALSE
	2024 (Milestone)	-	-
	2025 (Target)	-	-

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

Institutions and people contribute more effectively to advance a higher value-added and inclusive economic transformation

2023 marked continued collaborative efforts and commitment to advance women's participation in the economy. There was notable progress at the policy and strategy level, such as through the development of the Care Economy roadmap, which aimed to foster the government's commitment to advancing the Care Economy. The investment in the care economy will increase female labor force participation and generate at least 10.4 million new job opportunities by 2035. Some key partners, including UN Women, were consulted in the process of road map development. The Ministry of Women's Empowerment and Child Protection, in collaboration with various partners, including UNDP, has developed technical guidelines for gender-responsive climate change budget tagging. Other government institutions, such as the Center of Government Investment (PIP) and the Ministry of Communication, Information, and Technology, are consistently working to strengthen inclusive economic growth in Indonesia. Their support includes enhancing women's entrepreneurial skills and improving their access to financing. In the private sector, efforts to create a more gender-responsive business environment also continued in 2023. While there has not been a significant increase in WEP signatories in 2023, initiatives for women's empowerment from the private sector persist. For instance, companies like Indosat, Ooredoo, and Dana are implementing accelerators for women. Additionally, companies like Gojek contribute to the development of women's entrepreneurial skills by facilitating training implementation and material development. In the current year, UN Women Indonesia has reached over 3000 women entrepreneurs who reported improvements in business skills and a better understanding of gender equality, both within their families and communities. Women are more confident to engage in profitable economic activities as a result of these improved abilities. In the long term, the impact of this increased participation is expected to contribute to national economic growth. UN Women's Entrepreneurship initiatives consistently applied the principle of "none left behind" by giving access to groups such as rural women, migrant and former migrant women, single mothers, and other to participate in the activities.
