OUTCOME KIR_D_3.1 [XM-DAC-41146-KIR_D_3.1](#)

Women and men in target communities demonstrate support to survivors of violence and practice balanced power in their relationships

OUTCOME DETAILS

SDG alignment

Impact areas

Ending violence against women

Organizational outputs

Positive social norms

Policy Marker

GENDER EQUALITY

Humanitarian Scope

No

UN System Function

Advocacy, communications and social mobilization

Outcome Description

Extensive programs are carried out in communities to build and foster positive changes in social norms, attitudes, and behaviors that will prevent VAWG. Under this outcome, UN Women Fiji MCO is undertaking an intensive pilot project at the community level in Fiji, Kiribati, and X which is going to look at the social norms, attitudes, and behaviors that contribute to VAWG. The pilot is following the SASA model which is one of the approaches that has proven, evidence-based results in reducing incidences of violence at the community level, and stopping violence before it starts. The approach unpacks social norms around violence, power, control and gender inequality”.

Women and men in target communities demonstrate support to survivors of violence and practice balanced power in their relationships

In 2022, a total of 24,477 individuals were reached by the Strengthening Peaceful Villages (SPV) programme with 13,477 individuals (4,815 F, 4,058 M, 3,061 girls, 1,543 boys) reached through 435 unique community activities and 11,000 reached through roadshows that challenged rigid gender norms and promoted healthy relationships and better understanding of power "over" and "within" in relationships. MWYSSA was intensively supported throughout 2022 to continue to implement the Strengthening Peaceful Villages (SPV) programme. SPV is adapting and implementing the Raising Voices SASA! [1] community mobilization approach, which consists of four phases of social norm change programming (Start, Awareness, Support and Action). The community mobilization approach is targeting half of the country"s population (approximately 52,586 people) across fifteen villages in three areas – Betio, Eita (TUC 1) and Bikenibeu (TUC 2). The programme began in October 2018, with the Awareness phase ongoing for 17 months since June 2021. A further 11,000 women, men, boys and girls were reached through the 16 Days of Activism Against Gender-Based Violence SPV Drama Awareness raising roadshow. SPV staff and Village Activists (VAs) and Village Leaders (VLs) engaged communities in Betio, Bikenibeu and Teaoraereke, promoting positive, healthy relationships, challenging rigid gender norms and using SPV community facilitation tools such as posters and conversation starter kits. SPV aims to work towards change related to what women and men in the community know, how they feel, and what they do . This reflects the SPV approach to creating deep, lasting transformation that touches everyone on a personal level, including people"s understanding, beliefs and actions, across all four phases. The Awareness phase aims to deepen analysis of men"s power over women and the community"s silence about it. [1] <https://raisingvoices.org/women/the-sasa-approach/sasa-together/>
