Outcome Description

This outcome will address violence against women and girls in Malawi which persists due to entrenched patriarchal social norms and traditional negative practices. And the limited remains limited in scale and scope of the impact of normative frameworks implementation. In this SN UN Women will maximize popularization and monitoring of implementation of legislative frameworks, strengthening capacities of relevant national, district and local level institutions and women and girls besides facilitating access to quality services to vulnerable women and girls especially GBV survivors. It is assumed that the CO staff and relevant government and CSO stakeholders will have capacity and that legislative frameworks and operational documents are in place such as Chief's Act, Male Engagement Strategy and women's movements are vibrant besides availability of comprehensive accessible services.

Social norms, attitudes and practices hindering women and girl's rights are transformed at individual and community levels

UN Women has been employing barbershop toolkit to address behaviour and social/gender norms. Barbershop Toolbox uses Safe Spaces to Mobilize Men and Boys for Gender Equality. The toolbox provides men and boys with tools to address gender inequality and become agents of change. The toolbox guides on how to engage men in achieving gender equality such as through male role models. 3781 HeForShe champions have been oriented male engagement and positive masculinity using Barbershop Took Kit and M&E procedures to form He4She networks. They have been actively advocating for the elimination of social norms, attitudes and HP that cause gender-based violence. The HeForShe champions have managed to reach 7179 males and 5241 boys and have contributed towards reporting of 460 cases.
