STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

Palestinian national actors are better able to prevent violence against women and girls and deliver quality essential services to victims and survivors

Palestinian national actors are better able to prevent violence against women and girls and deliver quality essential services to victims and survivors. This outcome was mostly achieved as planned. Palestinian national actors were better able to prevent violence against women and girls and deliver quality essential services to victims and survivors. These results are evidenced by the increase in the VAW cases managed by the Palestinian Family and Juvenile Protection Department and by the One Stop Centre. Moreover, there is increase in the number of transferred cases by the Public Prosecutors to the Palestinian courts. UN Women continued to lobby and advocate with the relevant ministries and actors for the adaptation of the Family Protection Bill; and the amendment of the Penal Code and the Personal status law. In addition, UN Women developed/ amended/ and customized Five protocols, SoPs and manuals used by the justice, security and social sectors in managing cases of women victims and survivors of violence.
