INDICATOR STATEMENT	YEAR	BMTS	REPORTED RESULT
Number of people who have access to justice and the proportion of whom are women (CO, HQ)	(Baseline)	-	N/A
	2024 (Target)	-	

INDICATOR STATEMENT	YEAR	BMTS	REPORTED RESULT
Number of gender statistics and sex-disaggregated data collection initiatives, including in emerging areas conducted or analyzed (CO)	(Baseline)	-	N/A
	2024 (Target)	-	

STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : 2023

Communities and other stakeholders are better able to prevent and respond to violence against women and girls and deliver essential services to victims

The Government of Rwanda's commitment to GBV Prevention and response is reflected in various government efforts to increase community and other stakeholders' understanding of GBV Prevention and response. It is in this framework that UN Women in partnership with different key stakeholders namely Rwanda National Police, Ministry of Gender and Family Promotion, Ministry of Sports, gender monitoring office, and Haguruka and Rwanda Women's network have contributed to community, youth, media, and local leaders' engagement toward addressing negative social norms and behavior change. and embrace a positive attitude, timely report or and refer cases of GBV to relevant GBV service providers for proper case management. In addition, with UN Women support, GBV service providers (the multidisciplinary team at IOSCs and investigators, paralegals) have gained the capacity to effectively handle GBV cases as a result GBV victims have benefited from different services including legal aid support, socioeconomic reintegration, psychosocial and protection in the safe shelters. In terms of Leaving No One Behind, mobile GBV clinics are an efficient mean and approach to reach the most vulnerable and marginalized groups including those in remote areas without financial means to afford transport, awareness of their rights and/or available support services as well as women with disabilities. By using 15 mobile clinics, have reached more than 712 rights holders (509 females and 203 males) and helped to increase accountability among GBV service providers at both national and local levels as well as provide timely response to GBV cases. Furthermore, community-based monitoring and reporting tools were developed by UN Women in collaboration with Rwanda NGOs Forum on HIV/AIDS and Health Promotion to strengthen the capacity of institutions to respond effectively to GBV and HIV/AIDS-related issues with respect to leaving no one behind principle. In terms of building on the use of tools targeting female sex workers and adolescent girls and young women victims of GBV, 20 healthcare providers and peer educators were skilled in screening, referrals, and monitoring the quality of services rendered to girls and women at the community level and by health center facilities. 1451 female sex workers and 76 Adolescent Girls and Young Women benefitted from these services.
