	2025 (Target)	-	-

## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2023**

### Women have increased productivity, income and access to resources

Women still have limited control over factors of production compared to men. In agriculture, where most of the population is employed, only 39% of women have rights over the land that they cultivate. In 2023, the women's economic empowerment programme did not have resources for implementation. Most of the programme's effort went in to resource mobilization.
