## STRATEGIC NOTE OUTCOME PROGRESS NOTE

SHOWING DATA OF : **2022**

**More women and girls in West and Central Africa have equitable access to high quality public goods, services, and resources that are responsive to their needs in Peace, Security , Humanitarian and Disaster Risk Reduction (DRR) settings.**

As consequence of the capacity building initiative of Gender & DRR atelier carried out at regional level in Dakar (UN WOMEN Nov 2022), in which public institutions (gender and women ministry), Women Led Organisations and women organisation working in the sector, more women and girls, will be benefited from targeted gendered policies, risks preventions, action plans taking into consideration gender needs, the mainstreaming of gender and engagements made by these stake holders in their respective countries to improve access of women and girls to public and basis services. Practitioners on disaster risk reduction (DRR), disaster risk management (DRM) and climate change (CC) has been also aware about the need for gender-sensitive and inclusive DRR strategies and mechanisms in their countries and regions , including the global and regional frameworks (Sendai Framework, Africa Action Plan, ECOWAS Strategy for DRR and CCA). With the application of these national and regional frameworks at the institutional level, women and girls will have better or improved access to basic services and prevention mechanism on DRR, peace and security, and protection .
